

# NORTHERN ONTARIO CLIMATE CHANGE NETWORK

The Northern Climate Change Network (NCCN) is a learning network of five municipalities in northern Ontario working to assess and manage the risks and impacts of climate change.

With support from the Ontario Centre for Climate Impacts and Adaptation Resources (OCCIAR), northern Ontario municipalities will assess their vulnerability to climate change and increase their capacity and knowledge to develop adaptation solutions.

Members of the NCCN include:

City of Thunder Bay  
City of Timmins  
City of Sault St. Marie  
City of North Bay  
City of Greater Sudbury

In addition to the member municipalities, surrounding communities are welcome to join the network and participate in peer-to-peer dialogue. By working together, we will develop innovative solutions to the climate change impacts facing the north.

The NCCN is an initiative of the Climate Adaptation Partner Grants, delivered through the Federation of Canadian Municipalities and funded by the Government of Canada. For more information, visit: [http://climateontario.ca/p\\_NCCN.php](http://climateontario.ca/p_NCCN.php)
