

List of indicators chosen to assess the adaptive capacity of agriculture, and water quantity and quality in the Lake Simcoe subwatersheds:

Agriculture	
Jamieson	Indicators of Adaptive Capacity
Number of Animals	Farm Profit
Number of Irrigated Hectares	Water Users
Soil Erosion	Controlling Cropland Erosion Projects

Water Quantity	
MacRitchie and Stainsby	Indicators of Adaptive Capacity
Water Use/Availability	Water Conservation Programs
Baseflow Index	Baseflow Monitoring
Wetland Cover	Management Plans
Groundwater Availability	Impervious Cover
Forest Cover	Tree Planting Programs
Variability of Streamflow	Streamflow Monitoring
Water Quality	
MacRitchie and Stainsby	Indicators of Adaptive Capacity
Phosphorus Loading	Phosphorus Reduction Programs/Projects
Floodplain Area	Controlled versus Uncontrolled Stormwater
Sewage Bypass	Inflow and Infiltration Programs
