

# NORTHERN ONTARIO CLIMATE CHANGE NETWORK

**You are invited to join the Northern Climate Change Network!**

## What is the NCCN?

The NCCN is a learning network of five municipalities in northern Ontario working to assess and manage the risks and impacts of climate change. These members include:

- ❖ City of Thunder Bay
- ❖ City of North Bay
- ❖ City of Sault Ste. Marie
- ❖ City of Timmins
- ❖ City of Greater Sudbury

With support from the [Ontario Centre for Climate Impacts and Adaptation Resources](#) (OCCIAR), northern Ontario municipalities will assess their vulnerability to climate change and increase their capacity and knowledge to develop adaptation solutions.

In addition to member municipalities, surrounding communities are welcome to join the network. By working together, we will develop innovative solutions to climate change impacts facing the north.

## What are the benefits of joining?

By joining the NCCN, you will be part of a growing cohort of municipalities, organizations, and communities working towards climate change resilience in northern Ontario. Other benefits include:

- ❖ Invitations to webinars and events
- ❖ Newsletters containing updates from members
- ❖ Access to an online climate change community of practice
- ❖ Resources tailored to climate change impacts and adaptation in northern Ontario
- ❖ Opportunities to connect and learn from other members

**Join for free:**
