

List of indicators chosen to assess the adaptive capacity of agriculture, and water quantity and quality in the Lake Simcoe subwatersheds:

<b>Agriculture</b>	
<b>Jamieson</b>	<b>Indicators of Adaptive Capacity</b>
Number of Animals	Farm Profit
Number of Irrigated Hectares	Water Users
Soil Erosion	Controlling Cropland Erosion Projects

<b>Water Quantity</b>	
<b>MacRitchie and Stainsby</b>	<b>Indicators of Adaptive Capacity</b>
Water Use/Availability	Water Conservation Programs
Baseflow Index	Baseflow Monitoring
Wetland Cover	Management Plans
Groundwater Availability	Impervious Cover
Forest Cover	Tree Planting Programs
Variability of Streamflow	Streamflow Monitoring
<b>Water Quality</b>	
<b>MacRitchie and Stainsby</b>	<b>Indicators of Adaptive Capacity</b>
Phosphorus Loading	Phosphorus Reduction Programs/Projects
Floodplain Area	Controlled versus Uncontrolled Stormwater
Sewage Bypass	Inflow and Infiltration Programs
